Why did the Vatican want to wipe out true Irish history? What was the truth behind Akhenaten's 'only one god' reign? What don't we know about Arizona's (and Sedona's) connection to the Egyptians?

We'll explore these and other hidden agendas of those who have our Worst interests in mind. The heart-centered beings with our Best interests are helping us discover who we are. We have waited eons for this Moment in Time and it is our sovereign right to know our True History.

As the veils are being lifted on all major aspects of our financial, political, and religious lives and beliefs, our hidden history is also being radically revealed. New discoveries, old mysteries, experiential insights, past life rememberings, and channeled information all combine to reveal the amazing truth about our ancient ancestors and their advanced technologies.

Archeologists tell us the dynastic Egyptians never went beyond the Nile delta because they didn't have the materials, knowledge, or desire to build ocean-going vessels. Research and personal revelations show the misconceptions, denials, and in some cases downright lies, perpetrated by the rigid thinking of academia and the dark ones that conceal our connections to the Truth.

Many contacts between ancient and lost civilizations did take place, both physically and telepathically. Artifacts have been discovered remote from their original sources that prove the existence of far-reaching travel.

We're honored that Archangel Michael has answered many questions that reveal our true history relating to the distant past and our future Sedona City of Light.
